## PROSPECTUS

This company is owner of mining claims acquired from the General Development Company as vendor. The properties consist of a group of claims containing approximately 200 acres of mineral lands on which the General Development Company has expended large sums of money in developing and proving the value of the grounds. Reference is made for a description of the property, character of the ore deposits and the probable cost of production, to following report of J. Parke Channing, engineer, the eminent authority on copper properties:

"Adolph Lewisohn, Esq.,  
President, Miami Copper Company,  
"42 Broadway, New York City,

"Dear Sir:

"The property of the Miami Copper Company consists of about 300 acres, 200 of which is mineral land, located six miles west of the city of Globe, Arizona, at which city are the mines and works of the well-known Old Dominion Company.

"Development which is still being carried on shows to date 2,000,000 tons of concentrating ore, containing 3 per cent. of copper. Ore was struck at a depth of 220 feet, and the bottom of the shaft, at a depth of 500 feet, is still in ore, and the area shown of the ore body is 300 feet by 350 feet, without having as yet reached the limits, so that the prospects are that an enormous body of concentrating ore will be developed, as indicated by surface conditions.

"The Gila Valley Globe and Northern Railway ends at Globe, six miles distant, and surveys past the Miami have been made and right of way secured; this extension will pass within a quarter of a mile of the mine. There is abundant water available for concentration purposes.

"It is proposed to erect the first unit of a reduction works, which unit will have a daily capacity of 1,000 tons. This will give an annual production of 14,000,000 pounds of copper, based on 350 days' running time and a yield from the 3 per cent. ore of 2 per cent., or 40 pounds of copper to the ton.

"Concentrating tests have shown that the ore can be readily concentrated to 10 into 1 and the resulting concentrate smelted with the above yield of fine copper. It is estimated that the cost of electrolytic copper sold in New York will be 9c per pound. On this basis the profits at 12c copper will be \$420,000 per annum, and at 15c copper \$450,000 per annum. As developments advance a second unit of 1,000 tons daily capacity will be built, which will double the above figures of profit.

"It is estimated that it will require \$750,000 to erect the necessary first unit of the reduction works and that \$250,000 additional will be required for mine plant, shops, buildings, etc.

"The ore deposit of the Miami Copper Company is in nature similar to those of the Arizona Copper Company, the Nevada Consolidated Copper Company, the Utah Copper Company, and the Boston Consolidated Mining Company; that is, large masses of ore in which the copper as a sulphide mineral is disseminated through the rock and which readily yields a high grade concentrate by water treatment, which can be easily smelted.

"The mining is simple and cheap, and when found these deposits are the most valuable as copper producers. The Miami ore, running 3 per cent. in copper, as it does, is higher in grade than any of the above mentioned properties, and it will, without doubt, prove a large producer and dividend payer.

"Yours truly,  
(Signed) "J. PARKE CHANNING,  
"Consulting Engineer."

As the entire outstanding capital of the company (including the proceeds of the 200,000 treasury shares that are now being issued) amounts to only \$2,500,000, it will be apparent that the prospects are bright for large returns.

The company has in its treasury 300,000 shares of the par value of \$5.00 each. The balance of its share capital was issued to the General Development Company as vendor, in payment for the properties upon which the latter had expended large sums of money in acquiring and exploiting the claims. The various contracts between the original owners of the claims of the General Development Company and others from whom they were purchased, showing the original cost of the various properties, together with statements of the amounts paid therefor by the General Development Company, the moneys expended by it in exploiting and developing the properties and everything appertaining to their cost, will be filed at the office of the National Copper Bank open for public inspection.

It is intended to inaugurate a radical departure from previous methods in the issue of properties of this character, with a view to inviting public confidence by fully exposing the original cost and all profits connected with the flotation of the company.

For the purpose of providing the necessary funds for the erection of reduction works with a capacity for treating 1,000 tons of ore per day, and for the proper equipment of the properties for further development and the installation of machinery.

**200,000 SHARES OF THE TREASURY STOCK ARE NOW OFFERED FOR SUBSCRIPTION AT PAR, PAYABLE AS FOLLOWS:**

**\$2 per share to accompany the application for subscription; and the balance of \$3 per share payable within ten days after notice of final allotment.**

If less than the number of shares applied for is allotted, the sum paid on subscription will be credited on the number of shares allotted. On failure to make the final payment, the amount paid on subscription will be forfeited.

Applications for subscriptions should be made to the National Copper Bank, No. 115 Broadway, New York City. All checks should be made payable to the order of the National Copper Bank.

**The subscription list will be opened on APRIL 6, 1908, AND WILL BE CLOSED ON THE FOLLOWING DAY. The Company reserves the right, however, to close the subscription list at any time without notice; to reject any subscription, and to allot any smaller amounts than applied for.**

All proceedings connected with the organization of the company and the issue of its stock have been taken under the supervision of Messrs. Guggenheimer, Untermeyer & Marshall, the counsel for the company.

The expenses of the public issue other than the underwriting charges are borne by the General Development Company, so that the entire proceeds of this issue after deducting the underwriting commission, will be available as working capital in the treasury of the Miami Copper Company.

The entire issue of stock now being offered has been fully underwritten by responsible parties under an agreement that is lodged with the bankers, and is open for inspection. By this agreement the underwriters are bound to take all the stock not subscribed for by the public. This stock will be dealt in on New York and Boston curb.

## MIAMI COPPER COMPANY.

### ASK SENATE TO RESIGN

Finland Diet After Allnight Debate Carry Vote of Lack of Confidence.

HELSINGFORS, March 29.—At the close of a heated debate in the Finnish Diet, which lasted until 5 o'clock this morning, the Socialist members carried a vote of lack of confidence in the Senate, by 71 to 47.

The debate arose over certain anti-Finnish interpolations in the Russian and liberties of Finland against the present reactionary campaign in Russia. The Socialists formally censured the Finnish administration for the delivering of Russian terrorists and political agitators to the Russian authorities and for lack of firmness in resisting Russian encroachments upon the rights of Finland, and they demanded the retirement of the Senate as incapable of defending the autonomy of Finland.

Scott Allen, of Washington, D. C., who made an address at the meeting, the paper will be nonpartisan, and will be run along industrial lines. It will be the first of its kind in the country.

New Carolina Patch. (Special to The Times-Dispatch.)

SPENCER, N. C., March 29.—At a day meeting of the Board of Alder in the Lou- other women's last night a weekly newspaper launched. It will be known as the "Crescent," edited by
